

Task – 3: UI Clone Challenge

(NetflixHomepage Clone)

Introduction

This project is a Netflix Homepage UI Clone developed using HTML5 and CSS3. The website recreates the visual appearance and layout of the Netflix landing page, including the navigation bar, hero section, feature sections, FAQ section, and footer. The design is responsive and adapts to different screen sizes for a seamless user experience.

Objective

The objective of this project is to improve frontend development skills by recreating the user interface of a popular real-world website. This project focuses on layout design, responsiveness, styling techniques, and modern web design principles.

Technologies Used

- HTML5
- CSS3
- JavaScript (optional for interactions)

Features

- Netflix-inspired homepage layout
- Responsive navigation bar
- Hero section with call-to-action
- Feature sections highlighting services
- FAQ section
- Responsive design for mobile, tablet, and desktop devices
- Modern UI styling
- Footer section

Sample Code

```
<section class="feature">
```

```
  <div class="text">
```

```
    <h2>Enjoy on your TV</h2>
```

```
    <p>
```

```
      Watch on Smart TVs, PlayStation, Xbox,  
      Chromecast, Apple TV and more.
```

```
    </p>
```

```
  </div>
```

```
</section>
```

Conclusion

This project provided hands-on experience in recreating a real-world website interface using HTML and CSS. Through this Netflix Homepage Clone, I improved my understanding of responsive web design, layout structuring, and modern UI development practices. The project enhanced my confidence in building visually appealing and user-friendly web applications.
