

Task – 1: Responsive Portfolio Website

Introduction

This project is a responsive personal portfolio website developed using HTML, CSS, and Bootstrap . The website showcases my personal profile, technical skills, academic projects, and contact information in a clean and professional layout. The design is fully responsive and adapts seamlessly across desktop, tablet, and mobile devices.

Objective

The objective of this project is to create a professional portfolio website that highlights my skills, projects, and achievements while providing a user-friendly experience through responsive design and smooth navigation.

Technologies Used

- HTML
- CSS3
- Bootstrap
- JavaScript

Features

- Responsive navigation bar
- Smooth scrolling effect
- Hero/Home section
- Skills and Tools section
- Project Gallery
- Resume section
- Contact Information section
- Mobile-friendly design
- Bootstrap responsive layout
- Interactive card hover effects

Sections Included

Home Section

Displays my name, professional tagline, and a brief introduction.

Skills & Tools Section

Highlights technical skills including HTML, Java, python, GitHub, Responsive Design, and Problem Solving.

Project Gallery

Showcases projects including:

- Portfolio Website
- Contact Manager
- Inventory Management System
- Java Calculator Application

Contact Section

Includes GitHub profile, LinkedIn profile, and location details.

Sample Code

```
<section id="skills" class="container py-5">

  <h2 class="text-center mb-4">Skills & Tools</h2>

  <div class="row">

    <div class="col-md-3 mb-3">
      <div class="card p-3 text-center">
        HTML
      </div>
    </div>

    <div class="col-md-3 mb-3">
      <div class="card p-3 text-center">
        CSS
      </div>
    </div>

  </div>

</section>
```

Screenshots

Skills Section

Project Gallery

Portfolio Website

A responsive personal portfolio website developed using HTML, CSS and Bootstrap.

Reflection

Through this project I learned responsive web design, Bootstrap components and website structure. It improved my understanding of creating professional user interfaces.

Java Calculator Application

A calculator application developed using Java to perform basic arithmetic operations.

Reflection

Building this application strengthened my Java programming fundamentals and problem-solving skills.

Contact Manager

A JavaScript-based application developed to store, organize and manage contact information efficiently.

Reflection

Contact Section

Inventory Management System

An application designed to manage inventory records, product details and stock information efficiently.

Reflection

Through this project I learned how software can be used to simplify inventory tracking and data management. It enhanced my problem-solving skills and practical development experience.

Conclusion

This project helped me gain practical experience in responsive web development using HTML, CSS, Bootstrap, and JavaScript. I learned how to structure a professional portfolio website, create responsive layouts, improve user experience, and deploy web projects using GitHub Pages. The project also enhanced my frontend development and UI design skills.
